EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with attorney Bob Shaver on 4/6/04.

The application has been amended as follows:

In claim 1, line 11, before "which when", -- which is positioned generally adjacent to said trigger guard of said handgun when fully inserted in said holster body, -- has been inserted; in line 13, term "must" has been deleted, and term -- may -- has been replaced there.

In claim 4, line 12, "a locking tab" has been changed to --the locking tab--.

In claim 15, line 5, "said holster inner sleeve" has been changed to --a holster inner sleeve--.

In claim 18, line 6, "said holster inner sleeve" has been deleted, and --said holster body--has been replaced there.

In claim 35, line 1, "claim 32" has been changed to --claim 34--.

In claim 45, line 14, "must insert" has been changed to --may insert--.

In claim 54, line 14, "must insert" has been changed to -- may insert--.

2. The following is an examiner's statement of reasons for allowance:

In regard to claims 1-3, 6, 7, 22-27, 30, 31 and 50-53, claims 1-3, 6, 7, 22-27, 30, 31 and 50-53 are allowed because the prior art of record does not disclose a handgun holster comprising a release locking tab which is positioned generally adjacent to a trigger guard of the handgun when fully inserted in the holster body; and a finger tube with an axis generally parallel to a long axis of the holster body, enclosing the release locking tab.

In regard to claims 4, 5, 8-11, 13-16, claims 4, 5, 8-11, 13-16 are allowed because the prior art of record does not disclose or suggest a handgun holster comprising a finger tube formed in the holster body, the finger tube being oriented generally parallel to a long axis of the handgun when it is in the holster, the finger tube terminated adjacent to the handgun trigger guard, and the holster body having a locking tab passage for admitting a locking tab through the holster body. The handgun holster further comprising a spring plate assembly having a fixed plate, a first arm which include the locking tab, and a second arm which is attached to the first arm and includes a release tab which is operationally connected to the locking tab.

In regard to claims 17 and 18, claims 17 and 18 are allowed because the prior art of record does not disclose or suggest a handgun holster comprising a finger tube formed in the holster body, the finger tube being oriented generally parallel to a long axis of the handgun when it is in the holster, the finger tube terminated adjacent to the handgun trigger guard, and the holster body having a locking tab passage for an ejection port locking device. The handgun holster further

comprising a spring plate assembly having a fixed plate, a first arm which include a locking tab, and a second arm which is attached to the first arm and includes a release tab which is operationally connected to the locking tab. The locking tab engages an ejection port of the handgun to prevent withdrawal unless released by the release tab.

In regard to claims 32-40, 43 and 44, claims 32-40, 43, 44 and 54 are allowed because the prior art of record does not disclose or suggest a handgun holster comprising a holster body having a passage adjacent the handgun ejection port, and a locking tab configured to move through the passage into engagement with the ejection port until released by a release tab connected to the locking tab.

In regard to claims 45, 46, 48 and 49, claims 54. 46, 48 and 49 are allowed because the prior art does not disclose or suggest a handgun holster comprising a locking tab configured to move into engagement with an ejection port of a handgun when it is inserted to the holster, a release locking tab which is operationally connected to the locking tab, and a finger tube enclosing the release locking tab, with an axis generally parallel to a long axis of the holster body.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
